

EXPERTS IN END-TO-END MEAT TRANSPORTATION

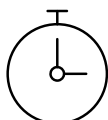

Livestock is of key importance for Australia and New Zealand. With vast areas of pasture and a favourable climate, the region offers ideal conditions to continue being one of the largest producers and exporters of meat worldwide.

MSC is active in 155 countries, with a solid presence in Australia and New Zealand, where our offices are spread over six states and the North and South Islands, respectively. At MSC, we understand the importance of preserving the conditions of frozen and chilled meat, even on some of the longest reefer sea miles of any global trade, such as New Zealand to the UK. With us, you can count on one of the largest reefers container fleets in the world, combined with a team of highly-qualified experts in fresh and frozen cargo handling.

Thanks to our extensive coverage and intermodal solutions, as well as our experience caring for reefer cargo, MSC can ensure proper transportation with continuous and uninterrupted cargo operations, connecting exporters to the main meat trade centers of the world.
