MyMSC VGM Submission

- The free-form container field can be used to manually add containers and weight information. Each field can be clicked and filled out, as well as specify between Kgs & Lbs.

- Please fill out at least one row prior to using the Add Container button to add an additional row to complete.

- If you'd prefer to use excel to upload information for multiple containers at once, you may download our pre-formatted excel document and fill out the criteria. Then, you can upload the same file once completed in order to import the information into the VGM fields.

- Once all information is entered and a signature is provided, you may submit VGM using the Submit button in the bottom right corner:

- You can keep track of all your submissions through the VGM Submission History feature:
