

BARLOCK SOLUTION **KEEP YOUR CARGO SAFE**

Safeguard your cargo from the risk of theft or tampering in transit with our innovative BARLOCK solution. Whether you're transporting coffee, electronic devices or other high-value goods, this single-use steel locking bar adds another layer of safety and security to containers, deterring unauthorized access and helping to guarantee the secure transportation of goods.

MSC BARLOCK – A SIMPLE, SAFE & SECURE SOLUTION

High-value cargo that crosses vast oceans and through complex supply chains needs appropriate protection. This is where BARLOCK, our simple, safe and secure locking system for shipping containers comes into play to provide you with peace of mind. This pick- and cut-proof solution provides additional security for your cargo, not only preventing it from being stolen but also helping to lower your insurance premiums.

HOW IT WORKS

BARLOCK is a one-time-use steel locking bar designed for shipping container doors to prevent unauthorized access or theft during transit. It fits around the bars on container doors to block picking and breaking into containers. It can only be opened at destination using a handheld circular steel saw.

PROCESS – PREPARATION TIME REQUIRED

The depot requires 48 hours to prepare containers for customers.

KEY BENEFITS

ENHANCED SECURITY

Enhance protection for high-value goods, such as coffee, high-tech and luxury products.

EASY TO USE

Easy installation. MSC will deliver the BARLOCK to your chosen depot ready for use.

COST SAVINGS

Helps to minimize the risk of theft and saves on insurance costs.
